

**“BIOLOGICAL MACHINES”**

---

**Introduction:**

**Welcome:** Today’s session is moving from the macro – looking at Space and the Universe (Cosmology) to looking at the micro – biology. You and I are perhaps some of the biggest cases for a creator.

So what is the science of a Human being, what are we made of?

<https://www.youtube.com/watch?v= 2Oiy3Z2m0c>

The reality is if we take all the chemical mass of a human in ingredients and mix it together you don’t get a human being. As Christians we believe the missing ingredient is he breath of God.

**Genesis 2:7**      *Then the LORD God formed a man from the dust of the ground and breathed into his nostrils the breath of life, and the man became a living being.*

**Colossians 1:17**      *He is before all things, and in him all things hold together.*

But there is more. He also makes us in His likeness.

**Genesis 1:26-28**      *Then God said, “Let us make mankind in our image, in our likeness, so that they may rule over the fish in the sea and the birds in the sky, over the livestock and all the wild animals,<sup>[a]</sup> and over all the creatures that move along the ground.”*

*<sup>27</sup> So God created mankind in his own image, in the image of God he created them; male and female he created them.*

**Question 1:**      How are we ‘like’ God (Likeness)?

**Question 2:**      How are we not ‘like’ God (Likeness)?

**Jeremiah 10:6**     *There is none like You, O Lord; You are great, and great is Your name in might.*

**1 Samuel 2:2**     *“There is no one holy like the Lord, Indeed, there is no one besides You, Nor is there any rock like our God.*

**Deuteronomy 32:39**     *“See now that I myself am he! There is no god besides me.  
I put to death and I bring to life, I have wounded and I will heal, and no one can deliver out of my hand.*

**Colossians 3:10**     *...put on the new self, which is being renewed in knowledge in the image of its Creator.*

So we both bear God’s image, likeness in all humans but we are not God, only he has power to give life and take life, in Him all things are held together. As we put our trust in Jesus we are made more into His likeness.

But do we all hold the imprint of our creator?

Remember Darwinism recognises that the was the basis for life. But when put into the atmosphere of the early earth didn’t evolve. Within a cell there are 3 billion units a 10<sup>th</sup> size of a pin head consisting of mechanical like proteins.

*Pause the video at the points it states*

## Pause Video – Question 1

What is this? **A Mouse Trap**

What is made of? **5 Specific components**

A simple mouse trap is made from at least six components: the platform, the spring, the hammer, the catch, the holdback bar, and staples. Without any of the components the machine will not function. Furthermore, each of the components have to be designed to a specific size and placed in a specific place in order for the mouse trap to function.

## Question 2:

**Do you think it is possible that if you had all these components in a bag and shook the bag up you would get a mousetrap?**

## Question 3:

**How therefore is a mousetrap made?**

A simple mousetrap is irreducibly complex. Nothing can be missing and it could not have arisen one piece at a time. It is not possible that the mousetrap could have “just happened” as components with other previous uses (such as a Popsicletm stick, a paper clip, a piece of wood, and a ball point pen spring) were put into a box and shaken. Because it is a irreducibly complex machine with multiple components

designed to perform specific functions, it is also obvious that it was built by an intelligent designer.

## Resume video

### Pause Video – Question 4

With the evidence presented regarding proteins mechanical structure where do you sit know sit if evolution is one end of room and creation formed by God is the other end of the room?

## Resume video to end

---

### Reflections from the video:

- Proteins show us that there is complexity that goes beyond natural course and leaves us the question how?
- We identify these proteins as mechanical structures because we ourselves in our creativity have been able to take separate components and construct machines, cars, computers, airplanes etc.

**Question 5:** *Why do you think we are beings who can construct components into working machines that resemble our own bodies (proteins)?*

## DNA

But there is more than simply these biological machines. Scientists have discovered an unmistakable language within all living things. Like a miniature library, DNA stores piles of information in extraordinary molecules that

specify the details of everything from the shape of flower petals to the color of your eyes.

But Evolutionists say it's only a small percentage of our DNA, this is incorrect in the scientific finding.

### **Question 6:**    *Where does Information come from?*

Consider you walk along a beach and you see the words hello in the sand for a moment before the waves washed it away how convinced would you be that the message was formed by the waves?

You wouldn't because we know information has a source.

Watch this video: <https://www.youtube.com/watch?v=p5m9J9IvCok>

DNA perhaps points to A supremely intelligent Author and Life-Giver who left His indelible message in every living thing.

**Romans 1:20**        *“For since the creation of the world His invisible attributes are clearly seen, being understood by the things that are made, even His eternal power and Godhead, so that they are without excuse”*

This scripture applies to all humans who have ever lived. From the beginning, people could see the things that were **made by God** and the incredible complexity and orderliness of the creation. But for thousands of years, mankind wasn't aware of a magnificent part of creation that lies hidden within the cells of every living creature: DNA.

### **Question 7:**    *With the information presented how much more are we 'without excuse'?*
